

— SEPTEMBER 2026

Your home-search ads held at 688 clicks with a higher click rate, while leads eased to 31 from 37.

Malfer & Associates • malferkc.com

THE MONTH IN 30 SECONDS

Your home-search ads drew 688 clicks for \$1,002, about the same as 686 last month, and your click rate rose to 5.8% from 5.3%. Your banners reached about 10,200 people for \$243, down from about 13,900 last month as each 1,000 views cost \$15.55 instead of \$12.28, and most of their views were outside the Kansas City area. Leads eased to 31 from 37, against 47 to 48 in a usual month: 29 home-search sign-ups and 2 phone taps, both still coming in as of October 6. You spent \$1,278, in line with \$1,279 last month. Next, we recommend a quick contact-form test, aiming your banners at the Kansas City area and testing new search ad wording.

WHAT WE CHANGED THIS MONTH We made no changes to your campaigns between September 9 and October 1, the stretch Google's change history covers, so these numbers show how the current settings performed. From next month, this spot will also show where each recommendation below stands: done, waiting on you, or dropped.

HOME-SEARCH AD CLICKS

688

Clicks on your Kansas City Home Search ads on Google, at \$1.46 each.

686 last month and 706 in a usual month; click rate up to 5.8% from 5.3%

PEOPLE YOUR BANNERS REACHED

about 10,200

Different people shown your banner ads this month, for \$243. Google's estimate.

About 13,900 last month and about 13,400 in a usual month, as each view cost more

LEADS

31

29 home-search sign-ups and 2 taps on the phone number on your website.

37 last month; 47 to 48 in a usual month

WEBSITE VISITS FROM YOUR ADS

831

831 visits to malferkc.com that your website's visitor numbers credit to your Google ads.

891 last month; 946 in a usual month

THIS MONTH, SECTION BY SECTION

5	BANNER PLACEMENTS	Where banners ran - 87 websites across the country, with few views in the Kansas City area
6	LOCAL SERVICES	Local Services ads - 67 clicks for \$32, up from 51
7	WHAT WE RECOMMEND NEXT	4 recommendations for the coming month

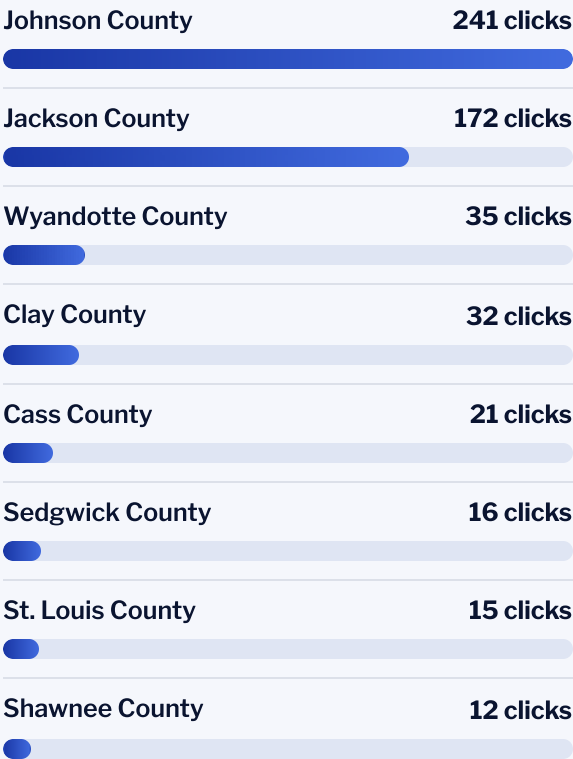

SEARCH ADS

Home-search ads - 688 clicks, with a higher click rate

Search ads appear when someone types what they want into Google. Your Kansas City Home Search ads drew 688 clicks for \$1,002, about the same as 686 last month and close to 706 in a usual month. Each click cost \$1.46, the same as last month.

Where people were when they clicked

Kansas City Home Search (Google search ads)

Towns people typed into Google before clicking

- Click rate: 5.8% of the times your ad showed led to a click, up from 5.3% last month, against 6.2% in a usual month. The ad showed 11,815 times, against 12,883 last month.
- Where clicks came from: 523 of 680 clicks (77%) came from people in the Kansas City area and 157 from elsewhere. The campaign is set to show in Kansas and Missouri, and also in New York City, Seattle and Los Angeles County.

- Room to grow: your ad showed on 10% of the searches it qualified for. It missed 73% because its ad rank was too low, down from 76% last month, and 16% because the day's budget ran out. Google sets ad rank from the bid and from how useful the ad and its page look.

What this means for you

More of the people who see your ad are choosing to click it, at a steady price per click. The bigger opening is ad rank, which sharper ad wording can help with over time; we are not recommending a bigger budget.

SEARCH WORDS

What people searched - 76% of visible clicks came from people shopping for a home

Google shows us the search words behind 61% of your search clicks (419 of 688), so these findings describe those searches only. Of the searches Google shows, people shopping for a home drew 317 clicks (76%) and 13 leads.

Shopping for a home 317 clicks · 76%

SEARCHES THAT WERE FOLLOWED BY A LEAD

loch lloyd homes for sale

houses for sale kansas city

mls real estate

malfer and associates kansas city

homes for sale

mls house listings

mls listings

homes for sale prairie village ks

Google shows the search words for 61% of clicks (419 of 688); the groups above describe those clicks.

Searches for the team by name: 14%. They come from people who already know you, so they are kept out of the groups above.

- Towns people typed: Kansas City (72 clicks), Loch Lloyd (62), Overland Park (27) and Lee's Summit (19) led the list.
- Searches followed by a lead included "loch lloyd homes for sale" (2 leads), "houses for sale kansas city" and "homes for sale prairie village ks". None of the visible leads came from a search naming a place outside your home market (0 of 19).
- Searches for your own name drew 58 clicks (14%) and 3 leads. These come from people who already know you, so we keep them apart from new demand. Searches naming other firms drew 8 clicks for \$8.97 and no leads.

What this means for you

Most of the searches Google shows came from people looking for homes in your area, led by Kansas City and Loch Lloyd. The searches for other firms' names are a small cost we can screen out.

LEADS

Leads - 31 this month, mostly home-search sign-ups

A lead is an ad visitor who reached out or signed up: a tap on your phone number, a home-search sign-up, or a form such as a contact or showing request. In all, 31 came in, 29 home-search sign-ups and 2 phone taps, against 37 last month and 47 to 48 in a usual month. All 31 came from your home-search ads.

WHAT THEY DID	LEADS	FROM WHICH ADS	WHAT IT MEANS
Signed up on your home search	29	29 Kansas City Home Search (search ads)	A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.
Tapped to call you	2	2 Kansas City Home Search (search ads)	A tap on the phone number on the website, from a phone. It does not confirm that a call connected or how long it lasted.
All leads this month	31		

ALSO HAPPENED, NOT COUNTED AS LEADS

1 Local services message lead

- Home-search sign-ups: 29, against 34 last month and 45 in a usual month. They kept coming after the month closed, most recently on October 6 (not counted here).
- Phone taps: 2, the latest also on October 6. A tap shows someone tapped your number, not whether a call connected.
- No contact form and no call from your ad's call button came in this month. Last month brought 1 contact request and 2 calls from ads; the last contact request was on August 11 and the last call from an ad on August 13.
- Cost per lead: \$41, against \$35 last month and \$27 in a usual month, as spending held at \$1,278 while leads eased.

What this means for you

Sign-ups and phone taps are still coming in. Contact forms have been quiet since August 11, so a quick test will show whether fewer people are sending them or whether new ones are not being recorded.

BANNER ADS

Banner ads - your name reached about 10,200 people for \$243

Banners keep your name in front of people as they read and browse online, so we judge them on being seen, not on leads. Shown here is your most-shown banner, the 970x250 size, with 3,434 views and 11 clicks.

Wide billboard banner

3,434 views, 11 clicks this month

Wide billboard banner

1,946 views, 2 clicks this month

Wide strip banner

1,320 views, 0 clicks this month

Shown: 3 of the 12 sizes of this design. Across all 12 sizes this month: 15,596 views, 94 clicks.

- Reach: your banners were shown 15,653 times to about 10,200 people, about 1.5 times each. Of the views Google could measure, 65% (10,016 of 15,495) were on screen, against 63% in a usual month.
- Cost: every 1,000 views cost \$15.55, against \$12.28 last month and \$11.77 in a usual month, so the same \$243 reached about 10,200 people instead of about 13,900 last month.
- Clicks: 95, against 187 last month and 218 in a usual month. 73 of the 95 came from phones, so we treat banner clicks as a light signal.

What this means for you

Think of a banner as a billboard: judge it by how many people it reaches and whether it is seen. Leads are a bonus. This month each view cost more, and the next section shows where the views landed.

BANNER PLACEMENTS

Where banners ran - 87 websites across the country, with few views in the Kansas City area

Your banner campaign is set to show anywhere in the United States, on a chosen list of 334 websites. This month 87 of them showed your banners, led by U.S. News & World Report with 1,889 views (12.1% of all banner views).

Where your banners ran

15,653 banner views this month, largest sites first

U.S. News & World Report		1,889 views 12% of views, 4 clicks
Bleacher Report		1,226 views 8% of views, 4 clicks
Los Angeles Times		1,135 views 7% of views, 2 clicks
publicschoolreview.com		863 views 6% of views, 1 click
Investopedia		779 views 5% of views, 0 clicks
Mashable		546 views 3% of views, 2 clicks
The other 81 sites		6,386 views 41% of views, 82 clicks
Site not named by Google		2,829 views 18% of views

The banners appeared on 87 different websites this month.

- Other leading sites: Bleacher Report (1,226 views), Los Angeles Times (1,135) and Investopedia (779). Google does not tie 2,829 views (18.1%) to any website.
- The 14 real estate sites on your list carried no views, and the 24 home design and architecture sites carried 6.

- By area, Los Angeles County had the most views (738, 4.9%). Jackson County had 153 views (1.0%), Johnson County 57 (0.4%) and Wyandotte County 24 (0.2%), so most of your banner views were seen outside your home market.

What this means for you

The opportunity is to put the same \$8.00 a day in front of people in the Kansas City area, and on the real estate and home design sites you chose. We would make these changes only with your go-ahead.

LOCAL SERVICES

Local Services ads - 67 clicks for \$32, up from 51

Local Services ads appear at the top of Google results. Yours drew 67 clicks for \$32, up from 51 last month, and 15.1% of the times the ad showed led to a click, up from 8.0%.

- The ad showed 444 times, against 634 last month, and each click cost \$0.48, down from \$0.64.
- Google Ads shows no leads from these ads this month or last. A message came through the ad on September 16, which Google keeps apart from leads.
- Calls, messages and bookings from Local Services ads live in their own lead list, which these numbers may not fully include, so we will check that list with you.

What this means for you

Local Services ads are judged on calls and messages. More people clicked this month, and the lead list will tell us whether those clicks turned into conversations.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Run a quick test on your contact form

QUICK CHECK

We recommend that our team send a test contact request through your website. If it reaches your team and is counted, the quiet stretch since August 11 is real and we look at the ads and the page. If it is not counted, the gap is in how forms are recorded, and we fix that first. Your team would see a test lead from us, named BLOK Test. We will also check the Local Services lead list for any calls or messages this month.

2

Aim the banners at the Kansas City area

TARGETING

We recommend setting the banner campaign to show in your home market, the Kansas City area, instead of the whole United States, within the same \$8.00 a day. We also recommend reviewing with you whether your search ads should keep showing in New York City, Seattle and Los Angeles County, since 157 search clicks came from outside the Kansas City area. We will wait for your answer before changing either.

3

Steer banners toward the real estate and home design sites on your list

WHERE BANNERS RUN

We recommend going through the 334 sites on your list with you before removing any, keeping the ones you want your name on. The aim is to give the 14 real estate sites and 24 home design sites on your list a better chance at your views.

4

Test new home-search ad wording

AD WORDING TEST

We recommend testing a new home-search ad built on the searches that brought leads this month, such as "loch lloyd homes for sale", within the current \$33 a day. Sharper wording and a closer match to the page can help ad rank over time, though Google sets rank and we cannot promise a change. Separately, we recommend screening out searches for other firms' names, which drew 8 clicks and no leads.

What we need from you this month

1. A yes to the test contact request.
2. A word on whether your team wants to reach people searching from outside the Kansas City area, for example buyers moving here from another city. Your answer tells us how far to narrow the banners and search ads, and we will not change anything without your go-ahead.
3. A short call with us to go through the 334 banner websites. We will send the full list and a few times to meet, so you can flag any site you do not want your name on.

PLAIN-ENGLISH GLOSSARY

Reach

How many different people were shown your banners, counting each person once. It is Google's estimate, so treat it as approximate.

Cost per 1,000 views

What it cost to show your banners 1,000 times.

Lead

An ad visitor who tapped your phone number on your website, signed up on your home search, or sent a form such as a contact, showing or home-value request. A phone tap shows the tap, not whether a call followed. Messages through Local Services ads are counted separately.

Views on screen

A view is each time a banner was shown on a page. It counts as on screen when a large part of the ad was visible long enough to be seen, by Google's standard.

A usual month

The average of the months June to August, before this one. It keeps an unusually busy or quiet month from setting the bar.

Home-search sign-up

A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.
