

— SEPTEMBER 2026

Your Penthouses search ads drew 329 clicks, up from 8 last month, at \$1.71 a click on average, while leads stayed at zero.

De Vos Real Estate • devosre.com

THE MONTH IN 30 SECONDS

Your Penthouses search ads drew 329 clicks this month, up from 8 last month, and each click cost \$1.71 on average, down from \$2.29. None of the searches Google shows were for your name, so these clicks came from people shopping, mostly for homes in Miami and Palm Beach. You spent \$562, all on Penthouses, against \$18 last month. No leads were recorded this month or last month, and the ads showed on 12% of the searches they qualified for, mostly missing the rest because they ranked too low. Next, we recommend a quick test sign-up and new ad wording to help the ads rank higher, within the current budget.

WHAT WE CHANGED THIS MONTH Your account's change history shows 4 edits from September 9 onward. Google keeps this history for a limited time, so it does not cover the first days of September. From next month, this spot will also show where each recommendation below stands: done, waiting on you, or dropped.

SEARCH ADS

Penthouses search ads - 329 clicks, up from 8 last month

Search ads appear when someone types what they want into Google, so we judge them on clicks from the right searches and on leads. Your Penthouses ads showed 7,254 times this month, up from 222 last month, and drew 329 clicks for \$562.

- Click rate: 4.5%, up from 3.6% last month.
- Cost: each click cost \$1.71 on average, down from \$2.29 last month.
- Every click this month came from the Penthouses campaign; your Miami Home Search ads did not show this month or last month.

What this means for you

Your search ads were seen far more often this month and each click cost less. The next step is making sure those clicks can turn into leads, starting with a quick test.

SEARCH WORDS

What people searched - home shopping led with 137 clicks

Google shows us the search words behind 59% of clicks (188 of 317), so the figures here describe those searches only. None of the 2,003 visible search terms were for your name, so these clicks reached people shopping for homes rather than people already looking for you.

Shopping for a home 137 clicks · 73%

Smaller groups, clicks in brackets: General real estate (no clear buy or sell) (8), Selling or home value (4), Other real estate firms by name (3).

Google shows the search words for 59% of clicks (188 of 317); the groups above describe those clicks. Searches for the team by name: none this month. Those come from people who already know you, so they are always kept apart from the groups above.

- Shopping for a home: 137 clicks (73% of the clicks Google shows), from searches such as "miami homes for sale" and "west palm beach homes for sale".
- Rentals: 15 clicks (8%) for \$26, from searches such as "miami rentals" and "miami apartments".
- Listing sites by name: 11 clicks (6%) from people who typed a site such as Zillow, yet clicked your ad.

What this means for you

Most of the clicks Google shows came from people looking to buy. The rental searches are a small, clear group we recommend screening out.

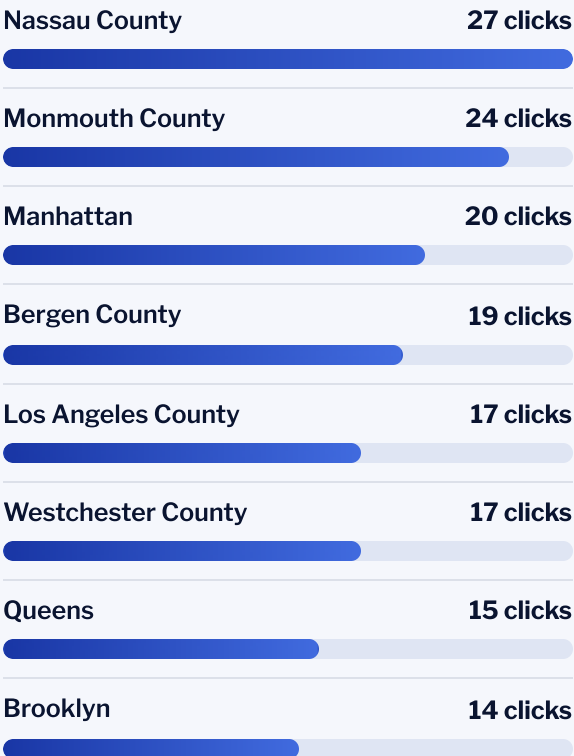

SEARCH AREAS

Where people searched from - Nassau County led with 27 clicks

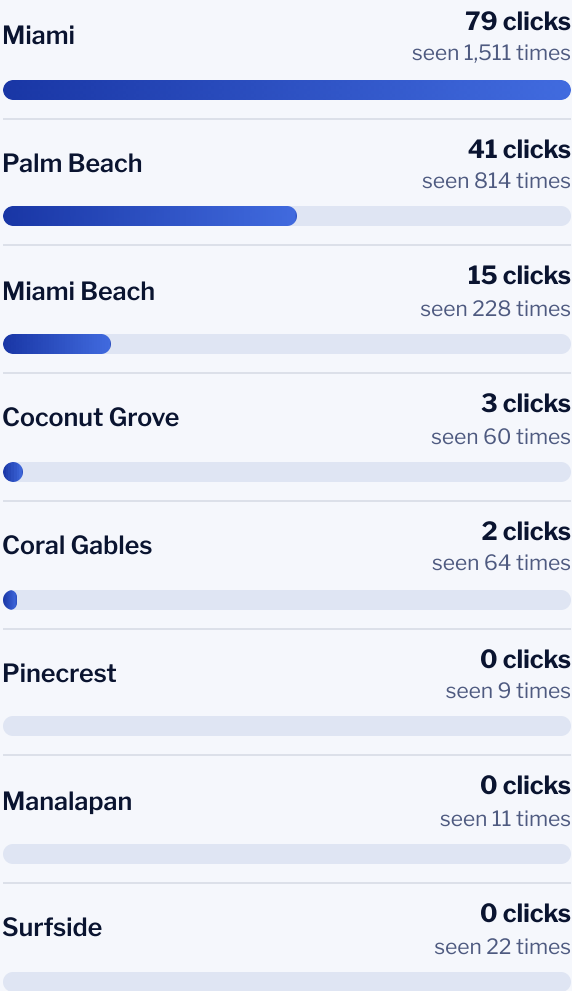

Your Penthouses campaign is set to show to people in the New York, Washington, DC, Los Angeles and San Francisco areas, and it leaves out the Miami-Ft. Lauderdale area and Palm Beach County. So these clicks came from people outside the Miami and Palm Beach areas, many of them searching for homes there.

Where people were when they clicked

Penthouses (Google search ads)

Towns people typed into Google before clicking

- Of the 309 clicks Google could place, Nassau County had 27, Monmouth County 24 and New York County 20.
- The towns people typed most were Miami (79 clicks), Palm Beach (41) and Miami Beach (15).
- These are the campaign's current settings, which may differ from earlier in the month.

What this means for you

Your ads are reaching people in other large metro areas who are shopping for homes in Miami and Palm Beach. If that is who you want to reach, the settings fit; if not, tell us and we will suggest changes.

MISSED SEARCHES

Missed searches - your ads showed on 12% of the searches they qualified for

Google estimates how many searches your ads could have shown on. This month your ads showed on 12% of them, against 28% last month.

- Ranked too low: 67% of qualifying searches went to other ads because your ad ranked too low, against 71% last month.
- Budget ran out: 22% were missed because the day's budget ran out, against 1% last month. The campaign is currently set to \$25 a day.
- Google sets ad rank from the bid and from how useful the ad and its page look.

What this means for you

Ad rank is the bigger gap, and it is the one we can work on within the current budget, with sharper ad wording. We are not recommending a bigger budget; any budget change is your decision.

LEADS

Leads - none recorded this month or last month

A lead is an ad visitor who reached out or signed up: a tap on your phone number, a call from the ad, a home-search sign-up, or a form such as a contact, showing or home-value request. No leads were recorded this month, from 329 clicks and \$562 of spend, and none last month.

No leads came in from the ads this month.

- Penthouses: no lead recorded since June 1.
- Miami Home Search: 5 home-search sign-ups since June 1, the latest on June 26. These ads did not show this month or last month; in a usual month they drew 161 clicks and 1 to 2 sign-ups for \$316.
- Leads are counted from the actions your account tracks, such as phone clicks, contact requests, showing requests and home-search sign-ups. An email sent straight to your team is not counted.

What this means for you

A quiet stretch does not tell us on its own whether fewer people reached out or whether new leads are not being recorded. A quick test sign-up will show which, and each answer points to a different fix.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Run a quick test sign-up on your website

QUICK CHECK

We recommend that our team make a test home-search sign-up and a test contact form on devosre.com in the coming month. If both reach your team and are counted, the quiet stretch is real and we look at the ads and pages. If either is not counted, we fix how leads are recorded first. Your team would see test leads from us, named BLOK Test.

2

Test new ad wording to lift ad rank

AD WORDING TEST

Your ads missed 67% of the searches they qualified for because they ranked too low. We recommend testing new ad wording that matches what people actually typed, such as "miami homes for sale", and checking that the page the ad opens fits those searches, all within the current budget.

3

Screen out rental searches

SEARCH WORDS

Rental searches drew 15 clicks for \$26 this month. We recommend screening out searches such as "miami rentals" and "miami apartments", so the budget goes to people looking to buy.

4

Keep watching click costs and click rate

KEEP WATCHING

We recommend no change yet to the Penthouses areas. We will keep watching cost per click, \$1.71 this month, and click rate, 4.5% this month, as the new wording goes live.

What we need from you this month

1. A yes to the test sign-up and test contact form.
2. A word on the Penthouses areas: is reaching people in the New York, Washington, DC, Los Angeles and San Francisco areas who search for Miami and Palm Beach homes what you want?
3. A yes to screening out rental searches.

PLAIN-ENGLISH GLOSSARY

Lead

An ad visitor who tapped your phone number, called from the ad, signed up on your home search, or sent a form such as a contact, showing or home-value request. Taps on your Google listing, such as directions, are not counted.

Click rate

The share of the times an ad showed in search results that ended in a click.

Ad rank

How Google decides which ads show and in what order, based on the bid and on how useful the ad and its page look.

Home-search sign-up

A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.

Share of searches shown

Of the searches your ad qualified for, the share where it actually appeared. It is Google's estimate.

A usual month

The average month from June to August, so one unusually busy or quiet month does not set the bar.
