

— SEPTEMBER 2026

Your search ads drew 197 clicks, the same as a usual month, and 13 home-search sign-ups, and none of the searches Google shows were for your team's name.

The Lanagan Group • thelanagangroup.com

THE MONTH IN 30 SECONDS

Your Nashville Home Search ads drew 197 clicks for \$486, the same number of clicks as a usual month, and none of the searches Google shows were for your team's name. Of those searches, 77% of clicks were people shopping for a home, with Franklin, Lebanon and Brentwood the towns named most. You had 13 leads, all home-search sign-ups, against 15 last month and 13 to 14 in a usual month, and sign-ups kept coming into October. Your ad showed on under 10% of the searches it could have, mostly because it ranked too low (82% missed on rank). Next, we recommend testing new ad wording, screening out searches for other firms' names and confirming with you which areas the ads should show in, all within the current budget.

WHAT WE CHANGED THIS MONTH Google's change history shows 3 edits to your account between September 9 and October 1, and it does not reach back to the start of the month. These numbers show how the account performed with those settings in place. From next month, this spot will also show where each recommendation below stands: done, waiting on you, or dropped.

SEARCH AD CLICKS

197

Clicks on your Nashville Home Search ads, and none of the searches Google shows were for your team's name.

204 last month; 197 in a usual month

LEADS

13

All 13 were home-search sign-ups, for \$486 in ad spend, or \$37 per lead.

15 last month; 13 to 14 in a usual month

CLICK RATE

6.9%

How often people clicked when your ad showed on Google.

Up from 6.4% last month; 7.1% in a usual month

SEARCHES YOUR AD SHOWED ON

under 10%

Your ad showed on fewer than 1 in 10 of the searches it could have, mostly because it ranked too low.

Under 10% last month too; missed on rank 82% of the time, against 72% last month

SEARCH ADS

Search ads - 197 clicks, none from searches for your name

Search ads appear when someone types what they want into Google. Yours drew 197 clicks for \$486, against 204 last month and 197 in a usual month. Google shows us the search words behind 105 of those clicks (53%), and none of the 647 searches it lists were for your team's name, so this budget reached people looking for homes, not people already looking for you.

Google shows the search words for 53% of clicks (105 of 197); the groups above describe those clicks.

Searches for the team by name: none this month. Those come from people who already know you, so they are always kept apart from the groups above.

- Shopping for a home: 81 clicks (77% of the clicks Google shows words for) cost \$236 and brought 7 leads, from searches such as "homes for sale lebanon tn" and "houses for sale in tennessee".
- Searches that turned into a sign-up included "franklin tn homes for sale", "houses for sale in lebanon tn", "brentwood tn houses for sale", "homes for sale spring hill tn" and "modular homes lebanon tn".
- Some clicks came from people looking for someone else: 9 clicks (9%) for \$15 were searches for another real estate firm by name and 5 clicks for \$11 were searches for an agent, with no leads from either.

What this means for you

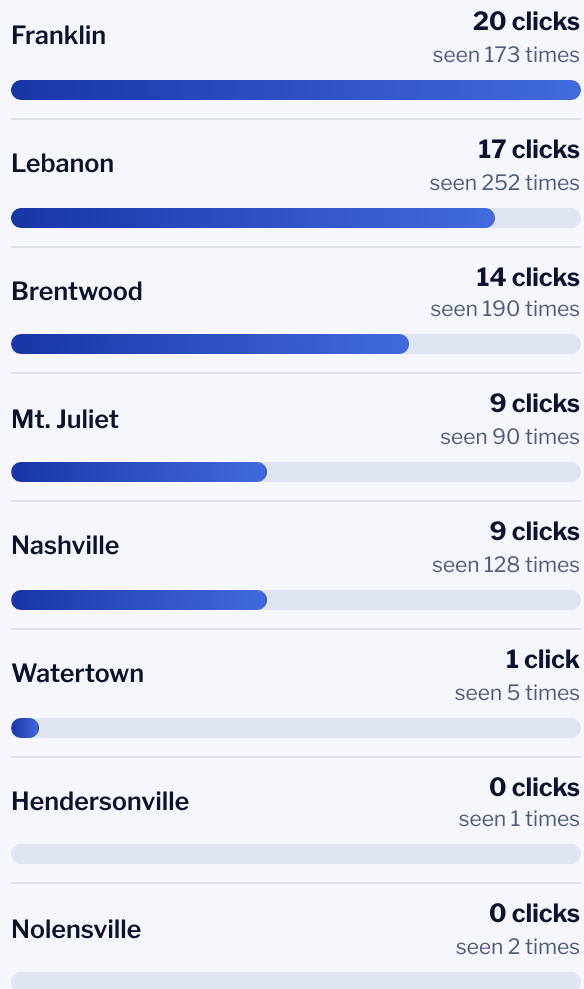

These ads are reaching people actively shopping for homes, not just people who already know you. The searches for other firms' names are a small place to tidy up, covered in our recommendations below.

TOWNS SEARCHED

Towns searched - Franklin led with 20 clicks, then Lebanon with 17

Many searchers typed a town into Google before clicking your ad. Franklin led with 20 clicks, followed by Lebanon with 17, Brentwood with 14, and Mt. Juliet and Nashville with 9 each.

Towns people typed into Google before clicking

Where people were when they clicked

Nashville Home Search (Google search ads)

- Where people were when they clicked: Davidson County 67 clicks, Wilson County 57 and Williamson County 31, out of 197.
- The campaign is set to show in a much wider list of areas, including Orange County, Los Angeles County, Cook County, New York City and the San Francisco Bay Area, as well as Davidson County, Wilson County and Williamson County.
- Franklin, Lebanon and Brentwood all appear among the searches that turned into a lead.

What this means for you

Most of your clicks came from people in Davidson County, Wilson County and Williamson County. We would like to check with you whether the other areas on the campaign's list are still wanted.

LEADS

Leads - 13 home-search sign-ups, against 13 to 14 in a usual month

A lead is an ad visitor who signed up on your home search, sent a form such as a contact request, or called from the ad. All 13 leads this month were home-search sign-ups, against 15 last month (14 sign-ups and 1 contact request) and 13 to 14 in a usual month.

WHAT THEY DID	LEADS	FROM WHICH ADS	WHAT IT MEANS
Signed up on your home search	13	13 Nashville Home Search (search ads)	A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.
All leads this month	13		

- Cost per lead: \$37, against \$32 last month and \$33 in a usual month. Spend was \$486 in both months, with 2 fewer leads this month.
- 6.6% of clicks became a lead, against 7.4% last month and 6.9% in a usual month.
- Sign-ups kept coming after the month closed, most recently on October 3. The quiet stretch since then is 3 days, shorter than an 8-day stretch in August (August 12 to August 19) before sign-ups picked up again.
- Since June 1 your ads have brought 53 home-search sign-ups, 1 call from the ad (June 9) and 1 contact request (August 17). This month is the lowest monthly lead count and highest cost per lead in the 3 full months of lead history we hold, which starts July 1.

What this means for you

A home-search sign-up is an early buyer signal: someone saving homes or setting up alerts, not yet asking to talk. Sign-ups held close to a usual month, while each one cost a little more.

AD RANK

Ad rank - your ad missed 82% of eligible searches by ranking too low

Your ad showed on under 10% of the searches it could have shown on. It missed 82% because its ad rank was too low, against 72% last month and 77% across June to August, and 13% because the day's budget ran out, against 22% last month. Google sets ad rank from the bid and from how useful the ad and its landing page look.

- Click rate: when your ad did show, 6.9% of people clicked, up from 6.4% last month and close to the usual 7.1%.
- Times shown: 2,847, against 3,183 last month and 2,784 in a usual month.
- Click cost: \$2.47 per click, against \$2.38 last month and \$2.30 in a usual month. Over a longer stretch, clicks cost \$2.36 on average in the last 3 months against \$1.82 in the 9 months before, so the same budget buys fewer of them: about 206 clicks a month instead of 242.

What this means for you

The biggest room to grow is ad rank, not budget, and we are not recommending a bigger budget. Sharper ad wording that matches the towns people search is the next thing we would work on, and we will report what moves rather than promise a ranking change.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Test new ad wording built on the towns people search

AD WORDING TEST

We recommend testing new ad wording that names the towns people search most, such as Franklin, Lebanon and Brentwood, and checking that each ad opens a home search for the town it names, within the current \$16 a day. The aim is a better ad rank on the searches your ad currently misses; we will report what changes rather than promise a result.

2

Screen out searches for other firms' names

SEARCH WORDS

We recommend screening out searches for other real estate firms and agents by name, a few at a time. This month they took 9 clicks for \$15 and 5 clicks for \$11, with no leads, and screening them out leaves more of the same budget for people shopping for homes.

3

Confirm where the ads should show

TARGETING

We recommend reviewing the campaign's area list with you. It is set to show in Orange County, Los Angeles County, Santa Barbara County, Ventura County, Cook County, DuPage County, Lake County, New York City and the San Francisco Bay Area as well as Davidson County, Wilson County and Williamson County, while most clicks came from people in Davidson County, Wilson County and Williamson County. If your team does not serve the other areas, we would remove them, and we will not change anything without your go-ahead.

4

Keep watching home-search sign-ups

KEEP WATCHING

We recommend no change here yet. Sign-ups were last recorded on October 3; if the quiet stretch runs past the 8 days seen in August, we will make one quick test sign-up to confirm new sign-ups are still being counted.

What we need from you this month

1. Does your team serve buyers in the other areas on the campaign's list, such as Orange County, Los Angeles County, Cook County and New York City? Your answer tells us whether to remove them.
2. A yes to screening out searches for other firms' and agents' names.

PLAIN-ENGLISH GLOSSARY

Lead

An ad visitor who signed up on your home search, sent a form such as a contact request, or called from the ad's call button. Taps on your Google listing are not counted.

Click rate

The share of times an ad was shown that ended in a click.

Ad rank

Google's score for whether your ad shows on a search. It comes from the bid and from how useful the ad and its landing page look.

Home-search sign-up

A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.

A usual month

The average of June, July and August 2026. It keeps one unusually busy or quiet month from setting the bar.

Searches your ad showed on

Out of all the searches your ad was eligible for, the share where it actually appeared. Google gives only a range when the share is very low.
