

— SEPTEMBER 2026

Your banners reached about 21,000 people for \$226, up from about 10,800 last month, while leads held at 0.

Stacey Froelich Team • staceyfroelichteam.com

THE MONTH IN 30 SECONDS

Your banners reached about 21,000 people this month (Google's estimate), up from about 10,800 last month, for \$226 against \$244 in August. Every 1,000 views cost \$3.87, down from \$5.99, and the banners drew 412 clicks, up from 387. A smaller share of views were on screen, 71% against 79% last month, so we are keeping an eye on it. Leads were 0, as in August, and banners are judged on being seen, not on leads. Next, we recommend a quick test sign-up and a review of the sites on your banner list.

WHAT WE CHANGED THIS MONTH Our account history shows no edits from September 9 through the end of September, so these numbers show how the current settings performed. Google keeps change history for a limited time, so the first days of September are not covered.

PEOPLE YOUR BANNERS REACHED

about 21,000

Different people shown your banner ads this month, for \$226. Google's estimate.

About 10,800 last month

COST PER 1,000 VIEWS

\$3.87

What it cost to show your banners 1,000 times this month.

\$5.99 last month

VIEWS ON SCREEN

71%

41,603 of 58,306 measured banner views were actually on screen.

79% last month (32,293 of 40,694 measured views)

LEADS

0

No phone taps, sign-ups or form requests were recorded from your ads; banners are judged on being seen.

0 last month; none from your banners since June 1

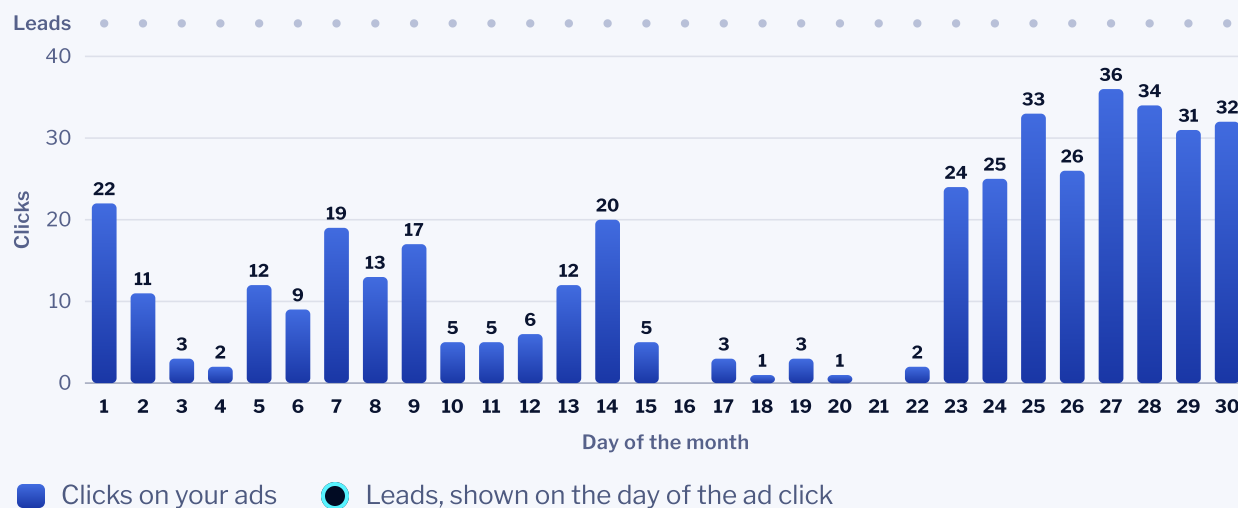

THIS MONTH, SECTION BY SECTION

1	BANNER ADS	Banner ads - your name reached about 21,000 people for \$226
2	BANNER PLACEMENTS	Where banners ran - The New York Times carried 35.6% of views
3	BANNER DESIGNS	Banner designs - 'Guiding You' was shown most, with 24,157 views
4	LEADS	Leads - 0 this month, as in August
5	WHAT WE RECOMMEND NEXT	3 recommendations for the coming month

BANNER ADS

Banner ads - your name reached about 21,000 people for \$226

Banners keep your name in front of people as they read the news and follow sports, so we judge them on being seen, not on leads. This month they were shown 58,334 times to about 21,000 people, about 2.8 times each, against about 10,800 people at about 3.8 times each last month.

- Cost: every 1,000 views cost \$3.87, down from \$5.99 last month, and putting your name in front of 1,000 different people cost about \$11, against about \$23.
- Spend: \$226 this month against \$244 in August, with banner views up from 40,706 to 58,334.
- On screen: 71% (41,603 of 58,306 measured views) were actually on screen, against 79% (32,293 of 40,694 measured views) last month.
- Clicks: 412, up from 387, at a click rate of 0.7% against 1.0% last month. Of these, 264 of 412 banner clicks came from phones, so we treat banner clicks as a light signal.

What this means for you

Think of a banner as a billboard on the avenue: judge it by how many people it reaches and whether it is actually seen. This month more people saw your name for less money, each a little less often, and a smaller share of views were on screen.

BANNER PLACEMENTS

Where banners ran - The New York Times carried 35.6% of views

Your banner campaign has a chosen list of sites: news, business, lifestyle, design, travel, tech and real estate. This month 111 of the 335 sites on the campaign's chosen list showed your banners, led by The New York Times with 20,791 views (35.6% of all banner views), 206 clicks. Google does not tie 3,899 views (6.7% of banner views) to a named site.

Where your banners ran

58,334 banner views this month, largest sites first

The New York Times		20,791 views 36% of views, 206 clicks
ESPN		11,636 views 20% of views, 14 clicks
The other 109 sites		22,008 views 38% of views, 418 clicks
Site not named by Google		3,899 views 7% of views

The banners appeared on 111 different websites this month.

- Your leading sites carried 67% of banner views: The New York Times 20,791; ESPN 11,636; HuffPost 3,118; U.S. News & World Report 1,962; AP News 1,782.
- ESPN showed 11,636 views (20.0% of all banner views), 14 clicks, at \$0.91 per 1,000 views, down from \$3.45 the month before.
- The New York Times charged \$5.09 per 1,000 views, against \$4.90 the month before.
- General and political news sites took 52% of banner views (30,277 views), and Google reports all 58,334 views (100.0%) in Manhattan; the campaign is set to show only in the Upper East Side.

What this means for you

The opportunity is the real estate, design and lifestyle sites on your list: the 14 real estate sites showed no banners, the 24 design and architecture sites showed 66 views and the 20 luxury, fashion and lifestyle sites showed 165 views. We will look into why before our review.

BANNER DESIGNS

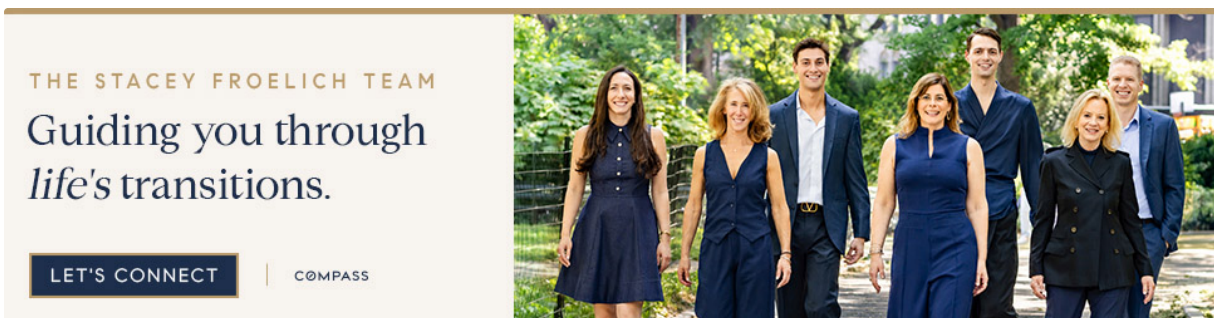

Banner designs - 'Guiding You' was shown most, with 24,157 views

Your banner designs all ran through the month, and Google decides which to show more often, so the view counts reflect how Google placed them, not a verdict on the design.

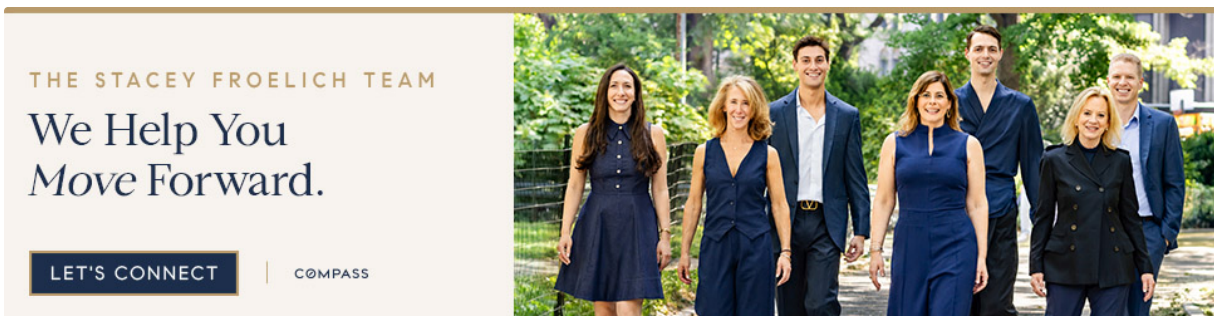

Medium box banner

6,002 views, 35 clicks this month

Wide billboard banner

5,286 views, 31 clicks this month

Wide billboard banner

5,068 views, 22 clicks this month

Shown: 3 of the 11 sizes of this design. Across all 11 sizes this month: 24,157 views, 165 clicks.

- 'Guiding You': 24,157 views, 165 clicks.

- 'Move Forward': 19,715 views, 141 clicks.
- 'Thoughtful Guidance': 14,462 views, 106 clicks.
- The individual banner shown most was Guiding You 300x250: 6,002 views, 35 clicks.

What this means for you

Clicks per view were about the same across the designs, so none stands out yet. We are not recommending new designs for now.

LEADS

Leads - 0 this month, as in August

A lead is an ad visitor who reached out or signed up, for example a tap on your phone number, a home-search sign-up, or a contact, showing or home-value request. Leads were 0 this month and 0 last month, and your banner campaign has recorded none since June 1.

No leads came in from the ads this month.

- Your account counts phone taps, calls from ads, home-search sign-ups and requests for contact, showings, consultations, appointments, home values, property details and market reports.
- Google also counted 0 view-through leads this month, meaning no one who saw a banner without clicking later signed up or reached out, so the banners are not credited with any later leads.

What this means for you

Banners are a billboard, so any lead from them is a bonus, not their scorecard. As nothing has been recorded since June 1, a quick test sign-up will confirm a lead is counted when a lead does come.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Run a quick test sign-up on your website

QUICK CHECK

We recommend that our team make a test sign-up on your website in the coming month. If it reaches your team and is counted, we know leads will show up in this report when they come. If it is not counted, we look into how sign-ups are recorded first. Your team would see a test lead from us, named BLOK Test.

2

Steer banners toward the real estate, design and lifestyle sites on your list

WHERE BANNERS RUN

We recommend keeping The New York Times, which carried 35.6% of all banner views, and going through the other news and sports sites on your list with you before removing any. The aim is to give the real estate, design and lifestyle sites on your list a better chance at the same \$8.00 a day.

3

Watch the share of views on screen

KEEP WATCHING

We recommend no change to the banner designs yet, and watching the share of views on screen, 71% this month against 79% last month, along with the click rate, over the coming month.

What we need from you this month

1. A yes to the test sign-up, so your team knows to expect a lead named BLOK Test.
2. A short call to go through the 335 sites on your banner list. We will send the full list first, so you can flag any site you do not want your name on.

PLAIN-ENGLISH GLOSSARY

Reach

How many different people were shown your banners, counting each person once. It is Google's estimate, so treat it as approximate, and it cannot be added across months.

Cost per 1,000 views

What it cost to show your banners 1,000 times.

Lead

An ad visitor who tapped your phone number, signed up on your home search, or sent a request such as a contact, showing or home-value request. A phone tap shows the tap, not whether a call followed.

Views on screen

A view is a time a banner was shown on a page. It counts as on screen when at least half the ad was visible for at least a second.

Click rate

The share of banner views that led to a click.

View-through lead

Someone who saw a banner without clicking and later signed up or reached out on your website.
