

— SEPTEMBER 2026

Leads rose to 7 from 6 and home-search clicks to 402, while your banners reached about 56,700 people for \$243.

SEED Property Group • seedpropertygroup.com

THE MONTH IN 30 SECONDS

Your ads brought 7 leads this month, up from 6 last month and 6 in a usual month, all of them home-search sign-ups. Your Austin Home Search ads drew 402 clicks, up from 388, at \$1.80 each, and your banners reached about 56,700 people (Google's estimate) for \$243, up from about 37,600 last month, with each 1,000 views costing \$2.17 instead of \$3.32. Each lead cost \$138, down from \$162 last month but above the \$122 of a usual month. Your search ads still missed 69% of the searches they qualified for because their ad rank was too low, so we recommend testing new ad wording within the current budget, along with a quick test of your contact form and phone link.

WHAT WE CHANGED THIS MONTH Your account's change history shows 39 edits to your campaigns between September 9 and October 1. Google keeps this history for a limited time, so it does not cover the first days of September, and we do not read this month's results as the effect of any particular edit. From next month, this spot will also show where each recommendation below stands: done, waiting on you, or dropped.

LEADS

7

7 home-search sign-ups: people who created an account on the home search on your website.

6 last month; 6 in a usual month

HOME-SEARCH AD CLICKS

402

Clicks on your Austin Home Search ads on Google, all 402 from people in the Austin area.

Up from 388 last month; about 300 in a usual month

PEOPLE YOUR BANNERS REACHED

about 56,700

Different people shown your banner ads this month, for \$243. Google's estimate.

About 37,600 last month; about 26,900 in a usual month

COST PER LEAD

\$138

Your total ad spend of \$968 divided by your 7 leads.

\$162 last month; \$122 in a usual month

THIS MONTH, SECTION BY SECTION

1	LEADS	Leads - 7 this month, up from 6
2	SEARCH ADS	Home-search ads - 402 clicks, up from 388
3	SEARCH REACH	Search reach - your ads showed on 14% of the searches they qualified for
4	BANNER ADS	Banner ads - your name reached about 56,700 people for \$243
5	BANNER PLACEMENTS	Where banners ran - ESPN carried 43.3% of views
6	WHAT WE RECOMMEND NEXT	4 recommendations for the coming month

LEADS

Leads - 7 this month, up from 6

A lead is an ad visitor who reached out or signed up on your website. All 7 this month were home-search sign-ups: people who created an account on the home search on your website, usually to save a search or get new-listing alerts. That is an early buyer signal, not a request to talk.

WHAT THEY DID	LEADS	FROM WHICH ADS	WHAT IT MEANS
Signed up on your home search	7	7 Austin Home Search (search ads)	A visitor created an account on the listings search on your website, usually to save homes or get new-listing alerts. An early buyer signal, not a request to talk.
All leads this month	7		

- Against 6 last month and 6 in a usual month, so sign-ups held steady and edged up.
- Cost: \$968 in ad spend across both campaigns, so each lead cost \$138, down from \$162 last month and above the \$122 of a usual month. With counts this small, cost per lead swings from month to month.
- All 7 came from your Austin Home Search ads, which is where we look for leads. Sign-ups kept coming after the month closed, most recently on October 4 (not counted here).
- Since June 1, every lead from these ads has been a home-search sign-up (28 in all). Your account also counts phone taps and contact, showing and home-value requests, and those have been quiet.

What this means for you

Sign-ups are steady. A quick test of your contact form and phone link will show whether those kinds of lead are simply rare or are not being recorded, and each answer points to a different next step.

SEARCH ADS

Home-search ads - 402 clicks, up from 388

Search ads appear when someone types what they want into Google. Your Austin Home Search ads drew 402 clicks for \$725, up from 388 last month and above the 300 of a usual month, and each click cost \$1.80, against \$1.88 last month. All 402 clicks came from people in the Austin area.

SEARCHES THAT WERE FOLLOWED BY A LEAD

hyde park houses

7505 stepdown cove austin tx 78731

Google shows the search words for 26% of clicks (104 of 402); the groups above describe those clicks. Searches for the team by name: none this month. Those come from people who already know you, so they are always kept apart from the groups above.

- Click rate: 4.6% of the times your ad showed, someone clicked, up from 4.1% last month and close to the 4.8% of a usual month.
- Sign-ups: 1.7% of clicks became a lead, up from 1.5% last month and a little below the 2.0% of a usual month.

- Google shows the search words behind 26% of clicks (104 of 402). None of those were searches for your team's name, so these ads reached people shopping for homes, not people already looking for you.
- Of the searches Google shows, shopping for a home drew 72% of clicks, for example "hyde park homes for sale", and a specific street address drew 17%. A search that turned into a sign-up was "hyde park houses".

What this means for you

These ads reach people in the Austin area who are shopping for homes. The next step here is a small one: screening out searches for other real estate firms by name.

SEARCH REACH

Search reach - your ads showed on 14% of the searches they qualified for

Your ads showed on 14% of the searches they qualified for, against 15% last month. They missed 69% because their ad rank was too low, down from 73% last month, and 17% because the day's budget ran out, against 12% last month. Google sets ad rank from the bid and from how useful the ad and the page it opens look.

- Missed because of ad rank: 69%, against 73% last month and 73% over June to August.
- Missed because the day's budget ran out: 17%, against 12% last month and 14% over June to August.
- Shown: 14%, against 15% last month and 13% over June to August.

What this means for you

Ad rank is the larger gap, not budget, and we are not recommending a bigger budget. The next thing to improve is ad rank, by testing new ad wording within the current budget; how Google ranks the new ads is not something we can promise.

BANNER ADS

Banner ads - your name reached about 56,700 people for \$243

Banners keep your name in front of people while they read the news or check sports scores, so we judge them on being seen, not on leads. Google estimates about 56,700 different people saw them this month, up from about 37,600 last month and about 26,900 in a usual month, for the same \$243 as last month. Shown here is your most-shown banner, Authentic Austin Charm, seen 14,462 times in its wide size.

Medium box banner

11,940 views, 30 clicks this month

Wide billboard banner

14,462 views, 19 clicks this month

Wide billboard banner

13,605 views, 32 clicks this month

Shown: 3 of the 11 sizes of this design. Across all 11 sizes this month: 34,752 views, 82 clicks.

- Reach: your banners were shown 112,002 times, about 2.0 times each, and 78% of the views Google could measure (87,074 of 111,904) were on screen, against 73% last month and 71% in a usual month.
- Cost: every 1,000 views cost \$2.17, against \$3.32 last month and \$3.17 in a usual month, so the same spend bought more views. Reaching 1,000 different people cost about \$4, against about \$6 last month.
- Clicks: 347, against 166 last month, a click rate of 0.3%. 280 of 347 banner clicks came from phones, so we treat banner clicks as a light signal.
- Designs: 'Dynamic' was shown most (56,574 views), then 'Authentic Austin Charm' (34,752 views) and 'Lets Grow Something' (20,676 views).

What this means for you

Think of a banner as a billboard on the drive into Austin: judge it by how many people it reaches and whether it is actually seen. This month it reached more people for the same spend, and leads are a bonus, not its scorecard.

BANNER PLACEMENTS

Where banners ran - ESPN carried 43.3% of views

Your banner campaign showed on 131 of the 334 sites on the campaign's chosen list. The top five sites carried 71% of views, led by ESPN with 48,487 views (43.3% of all banner views) at \$0.60 per 1,000 views, against \$1.56 last month.

Where your banners ran

112,002 banner views this month, largest sites first

ESPN		48,487 views 43% of views, 85 clicks
The New York Times		16,419 views 15% of views, 31 clicks
Yahoo		6,136 views 5% of views, 7 clicks
The Hill		4,317 views 4% of views, 10 clicks
CNN		4,002 views 4% of views, 16 clicks
BBC		2,449 views 2% of views, 6 clicks
The other 125 sites		25,231 views 23% of views, 192 clicks
Site not named by Google		4,961 views 4% of views

The banners appeared on 131 different websites this month.

- The New York Times showed 16,419 views at \$1.58 per 1,000 views, against \$3.79 last month, followed by Yahoo (6,136 views), The Hill (4,317 views) and CNN (4,002 views).
- The real estate sites on your list (14 of them) showed 8 views, the design and architecture sites (24) showed 19, and the luxury, fashion and lifestyle sites showed 467.
- Where: Travis County had 95,903 views (85.6%) and Williamson County 16,099 views (14.4%), led by Austin, Pflugerville, Cedar Park and Round Rock.
- Google does not tie 4,961 views (4.4% of banner views) to any website, so the site chart covers 107,041 of 112,002 banner views.

What this means for you

The opportunity is the real estate, home-design and lifestyle sites on your list, which barely showed your banners. We will look into why and go through the list with you before changing anything.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Run a quick test of your contact form and phone link

QUICK CHECK

We recommend that our team send one test contact request from your website and tap the phone number once from a phone in the coming month. Since June 1, every lead from these ads has been a home-search sign-up, and the test will show whether the other kinds of lead are simply rare or are not being counted. Your team would see one test lead from us, named BLOK Test.

2

Test new wording on your home-search ads

AD WORDING TEST

We recommend testing new home-search ad wording, with a closer match between each ad and the page it opens, within the current budget. Your ads missed 69% of the searches they qualified for because of ad rank, so this is the next thing to improve. We will compare clicks and sign-ups for the new and current ads before keeping either.

3

Screen out searches for other real estate firms

SEARCH WORDS

We recommend checking the searches for other real estate firms by name, which drew 4 clicks for \$7.39 among the searches Google shows and no leads, and screening out the ones that clearly name another firm. General searches for homes in your area stay in.

4

Steer the banners toward the real estate, home-design and lifestyle sites on your list

WHERE BANNERS RUN

We recommend keeping ESPN and The New York Times, which carried the most banner views at a low cost per 1,000 views, and going through the other sites on your list with you before removing any. The aim is to give the real estate, home-design and lifestyle sites on your list a better chance within the same spend.

What we need from you this month

1. A yes to the test contact request and phone tap (recommendation 1).
2. A short call with us to go through the 334 banner websites (recommendation 4). We will send the full list and a few times to meet, so you can flag any site you do not want your name on.

PLAIN-ENGLISH GLOSSARY

Reach

How many different people were shown your banners in the month, counting each person once. It is Google's estimate, so treat it as approximate, and it cannot be added across months.

Cost per 1,000 views

What it cost to show your banners 1,000 times. Lower means the same spend puts your name in front of more people.

Lead

An ad visitor who signed up on your home search, tapped your phone number or sent a form such as a contact, showing or home-value request. A home-search sign-up means a visitor created an account to save homes or get new-listing alerts: an early buyer signal, not a request to talk.

Views on screen

A view is each time a banner was shown on a page. It counts as on screen when Google confirms the ad was actually visible, not just loaded low on a page nobody scrolled to.

Click rate

Out of all the times an ad was shown, the share that led to a click.

A usual month

The average month from June to August 2026, so a busy or quiet month on its own does not set the bar.
