

— SEPTEMBER 2026

Your banners reached about 70,700 people for \$241, up from about 48,000 in August, at \$2.31 per 1,000 views.

Joanne Sells Chicago • joannesellschicago.com

THE MONTH IN 30 SECONDS

Your banners reached about 70,700 people in September (Google's estimate) for \$241, up from about 48,000 in August and about 58,600 in a usual month. Each 1,000 views cost \$2.31, down from \$3.16 last month and close to the usual \$2.26, and 75% of measured views were on screen. Clicks rose to 334 from 201. Of the views Google could place, 63.4% were in Cook County, with some as far away as Minneapolis and Indianapolis, so we recommend checking the campaign's location setting. There were 0 leads, as in August and a usual month; banners are judged on being seen, and we recommend a quick test lead to confirm leads are recorded.

WHAT WE CHANGED THIS MONTH We made no changes to your campaign. Google keeps a limited stretch of change history, which for this report starts on September 9, and no edits were recorded in it, so these numbers show how the current settings performed.

PEOPLE YOUR BANNERS REACHED

about 70,700

Different people shown your banner ads in September, for \$241. Google's estimate.

About 48,000 last month; about 58,600 in a usual month

COST PER 1,000 VIEWS

\$2.31

What it cost to show your banners a thousand times over.

\$3.16 last month; \$2.26 in a usual month

VIEWS ON SCREEN

75%

77,550 of 104,057 measured banner views were actually on screen.

73% last month; 69% in a usual month

LEADS

0

No phone taps, home-search sign-ups or form requests came from your ads. Banners are judged on being seen.

0 last month; 0 in a usual month

THIS MONTH, SECTION BY SECTION

1	BANNER ADS	Banner ads - your name reached about 70,700 people for \$241
2	BANNER DESIGNS	Banner designs - each design drew 167 clicks
3	BANNER PLACEMENTS	Where banners ran - ESPN carried 46.3% of views
4	BANNER LOCATIONS	Where viewers were - 63.4% of placed views in Cook County
5	LEADS	Leads - 0 in September, as in August and a usual month
6	WHAT WE RECOMMEND NEXT	4 recommendations for the coming month

BANNER ADS

Banner ads - your name reached about 70,700 people for \$241

Banners keep your name in front of people as they read the news, follow sports or browse on their phones, so we judge them on being seen, not on leads. In September your banners were shown 104,161 times to about 70,700 people, about 1.5 times each.

- Reach: about 70,700 people, up from about 48,000 in August and about 58,600 in a usual month. Each month is measured on its own, so these figures cannot be added together.
- Cost: \$2.31 per 1,000 views, down from \$3.16 in August and close to the usual \$2.26. That works out to about \$3 per 1,000 people reached, against about \$5 last month.
- On screen: 75% of the views Google could measure were actually on screen (77,550 of 104,057), up from 73% in August and 69% in a usual month.
- Spend: \$241, about the same as August's \$243 and below a usual month's \$323.

What this means for you

Think of a banner as a billboard on the drive into the city: judge it by how many people see it and whether it is actually on screen. This month it reached more people for about the same money as August.

BANNER DESIGNS

Banner designs - each design drew 167 clicks

Your banners rotate between designs, and Google showed them about equally. Real Estate Is Personal was shown 50,624 times and the other design 53,537 times, and each drew 167 clicks. The banner shown most was Real Estate Is Personal in the 336x280 size, with 12,770 views.

Large box banner

12,770 views, 39 clicks this month

Phone strip banner

11,452 views, 31 clicks this month

Wide billboard banner

9,770 views, 23 clicks this month

Shown: 3 of the 12 sizes of this design. Across all 12 sizes this month: 50,624 views, 167 clicks.

- Clicks: 334 in all, up from 201 in August, against 377 in a usual month. The click rate held at about 3 per 1,000 views (0.3%).

- Cost per click: \$0.72, down from \$1.21 in August and \$0.85 in a usual month.
- Phones: 81.0% of views were on mobile, and 286 of 334 banner clicks came from phones. Taps on a small screen can include accidental ones, so we treat banner clicks as a light signal.

What this means for you

Both designs are being seen about equally, so there is no need to change them yet. Clicks are a bonus, not the scorecard.

BANNER PLACEMENTS

Where banners ran - ESPN carried 46.3% of views

Your banner campaign has a chosen list of sites, and 140 of the 383 sites on it showed your banners in September. ESPN led with 48,191 views at \$0.72 per 1,000 views, followed by The New York Times (14,142), ZeroHedge (4,363), BBC (4,009) and Yahoo (3,051). Together those sites carried 71% of views.

Where your banners ran

104,161 banner views this month, largest sites first

ESPN		48,191 views 46% of views, 62 clicks
The New York Times		14,142 views 14% of views, 53 clicks
The other 138 sites		36,999 views 36% of views, 219 clicks
Site not named by Google		4,829 views 5% of views

The banners appeared on 140 different websites this month.

- Real estate and design sites: the 17 real estate sites on your list showed 0 views and the 24 design and architecture sites 42 views. Lifestyle sites carried 762 views (1%).
- News: general and political news sites carried 21,749 views (21%). The New York Times charged \$2.42 per 1,000 views, and nbcchicago.com showed 1,845 views at \$1.65.
- Google does not tie 4,829 views (4.6% of banner views) to any website, so the site chart adds up to 99,332 of 104,161 views.

The opportunity

The real estate and design sites on your list barely showed your banners. We would like to go through the list with you and give them a better chance within the same budget.

BANNER LOCATIONS

Where viewers were - 63.4% of placed views in Cook County

The campaign is set to show in Chicago. Some views had no location, so these shares count only the views Google could place. Of those, 63.4% (61,236 views) were in Cook County, led by Chicago itself with 55,919, then Norridge (485), Park Ridge (356) and Lincolnwood (350).

- Cook County viewers gave 174 of the 334 banner clicks.
- Nearby, DuPage County had 1,790 views and Will County 1,099.
- Farther away, views showed up in Minneapolis (3,440), Indianapolis (2,557), Birmingham (2,479), Milwaukee (842) and Dallas (695), with small numbers in other states and abroad.

What this means for you

Views in Minneapolis or Dallas do little to keep your name in front of buyers and sellers in Chicago. Checking the location setting could keep more of the same budget in your home market.

LEADS

Leads - 0 in September, as in August and a usual month

A lead is someone who, after clicking an ad, tapped your phone number, signed up on your home search or sent a request such as a contact, showing, consultation or home-value request. There were 0 leads in September, 0 in August and 0 in a usual month.

No leads came in from the ads this month.

- The banner campaign has recorded no leads since June 1. Banners are judged on being seen, so this is not their scorecard; any lead is a bonus.
- Nobody who saw a banner without clicking was later recorded as a lead either (0 such leads in September).
- Anything outside the account's list of lead actions, such as an email sent straight to your team, is not counted here.

What this means for you

With no leads recorded since June 1, a quick test lead will show whether a new lead would be counted. Banners are judged on being seen either way.

WHAT WE RECOMMEND NEXT

Recommendations for the coming month

1

Keep the banners in the Chicago area

TARGETING

We recommend checking the campaign's location setting so the banners show only to people located in the Chicago area, not to people elsewhere who show an interest in it. Views landed as far away as Minneapolis, Indianapolis and Birmingham. This may mean fewer people reached at first, and we will not change it without your go-ahead.

2

Go through your banner site list together

WHERE BANNERS RUN

We recommend going through the 383 sites on your list with you before removing any. ESPN carried 46.3% of views at a low cost, and we suggest keeping it. The aim is to give the real estate and design sites on your list a better chance at the same \$8.00 a day.

3

Run a quick test lead

QUICK CHECK

We recommend that our team send a test request through your website, such as a contact form, to confirm it is counted as a lead. If it is counted, the quiet stretch is simply how banner ads behave; if not, we fix how leads are recorded first. Your team would see a test lead from us, named BLOK Test.

4

Keep an eye on cost and on-screen rate

KEEP WATCHING

We recommend no change to the banner designs yet, and watching cost per 1,000 views, \$2.31 this month against the usual \$2.26, and the on-screen rate, 75% this month.

What we need from you this month

1. A yes to the location check. We will tell you what we find before changing anything.
2. A short call with us to go through the banner site list, so you can flag any site you do not want your name on.
3. A yes to the test lead, so your team knows to expect it.

PLAIN-ENGLISH GLOSSARY

Reach

How many different people were shown your banners, counting each person once. It is Google's estimate, so treat it as approximate, and each month is measured on its own.

Cost per 1,000 views

What it cost to show your banners a thousand times. Lower means more views for the same budget.

Lead

Someone who, after clicking an ad, tapped your phone number, signed up on your home search, or sent a request such as a contact, showing or home-value request.

Views on screen

A view is a time a banner was shown on a page. It counts as on screen when it met Google's standard for being visible; a banner low on a page nobody scrolls to does not count.

Click rate

Out of every 1,000 times a banner was shown, how many times someone clicked it.

A usual month

The average of June to August, the months before this one. It keeps an unusually busy or quiet month from setting the bar.
